ECE 2564
Fall 2025
Homework 9

Please sign

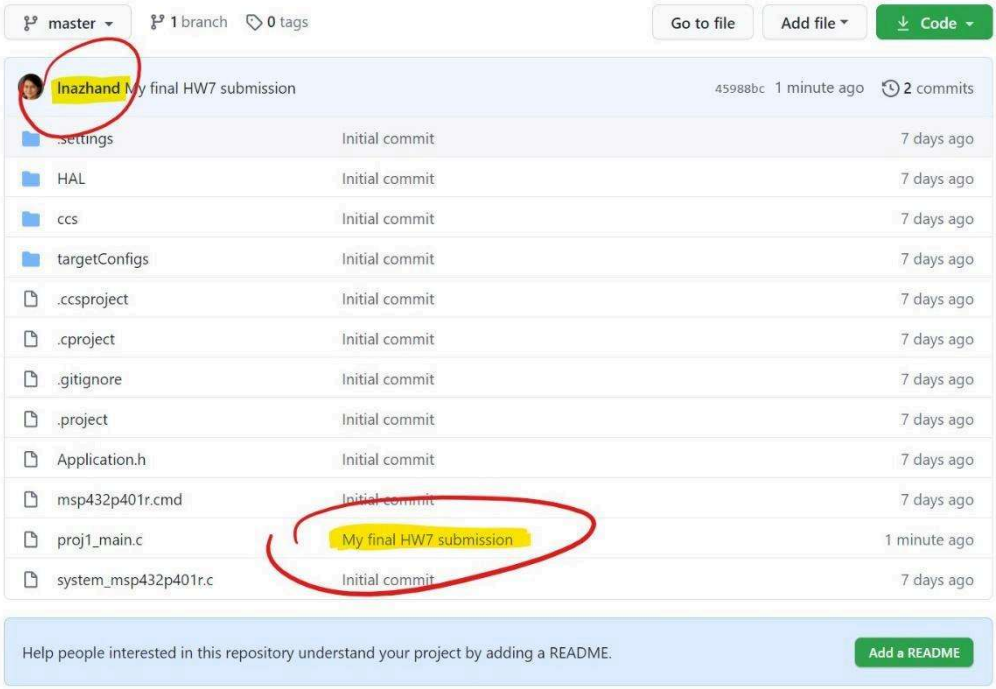

"I have neither given nor received unauthorized assistance on this assignment. I have not copied any part of this submission from unauthorized resources".

For this assignment, you will complete parts of project 2. You can work on any part of project 2 you wish but to get credit for this assignment, you need to complete the steps below.

Fill the below table with what you expect to get for each part:

Item	Full points	Expected points
A title screen displays the name of the game and your name.	5	
After three seconds, the title screen disappears, and the main menu screen is shown. The menu screen has “Menu” written at the top and three options: Play, Instructions, and High scores.	5	
In the Menu, pressing BB1 will move the cursor up, and pressing BB2 will move the cursor down.	5	
In the Menu, the cursor wraps around from play and high score. (e.g. pressing BB2 when selecting High Scores will move the cursor to Play.)	5	
Pressing JSB while selecting instructions or high scores will show the instructions or high score screen, respectively. These screens only need to print “Instructions” or “High Scores” for HW9.	5	
Pressing JSB while selecting play will move to the game screen with “Game” printed at the top.	5	
In the game, show the player character floating around on the screen. It should never float outside of the edge margins (20 pixels left and right) or off the screen.	30	
In the game, pressing BB1 will fire a bullet from the player. The bullet should move straight up, and only one bullet can be fired at a time.	30	
In the game, show that the player has their health printed in a circle in the bottom left side of the screen, inside the edge margin.	10	

When you are ready to submit your HW9, commit your work to GitHub with a meaningful message such as "My HW9 submission". Take a screenshot of your GitHub submission on the GitHub website highlighting your GitHub ID and your submission message. See the below example**. Replace the below image with your own screenshot from GitHub site.**

Submit the updated version of this document to Canvas by the deadline for HW9.
